

Abstract

Haldi Mäesalu

Experience of the Estonian central authority

The presentation will give an overview of the Estonian legislation and practice in applying the Regulation and co-operating with other central authorities. About 90% of Estonia's applications are with Finland and about half of them are from the Finnish Social Insurance Institution, which is the competent public body. Because of this Estonia and Finland have very close relations and the presentation will give an overview of the Estonian-Finnish system also.
